Circlezon empowers people

We empower people to organize all their contacts in one place, make the right new contacts, and present both professional and personal profiles - just like you do in real life. Circlezon is for everyone - from busy executives to busy soccer moms - as an indispensable tool for managing, finding, and interacting with people in a better and more comprehensive way. CZ delivers the features missing from the biggest social network and introduction sites. Circlezon is fun, fast, a huge time saver, and helps users stay better connected. CZ is the answer to today's hyper-connected world; it takes networking and contact management to a whole new level.

BRONWAY
INNOVATION IN AUTOMATION

MAKERS OF CUSTOM AUTOMATED SOLUTIONS

BRONWAY
INNOVATION IN AUTOMATION

CD-300[®] CD/DVD SPINDLE COUNTER

Losing count of CD/DVDs in production can cause major problems at the various processing stages (whether in-house or at the customer site) which ultimately are very costly to rectify.

Bronway Ltd. has designed the CD-300 Spindle Counter as a low cost unit to automate and simplify the accurate count of 120mm and 80mm CD/DVDs transported on spindles at the various stages in CD/DVD manufacturing plants and in software companies.

The CD-300 Spindle Counter offers significant advantages and cost savings over existing count/measurement methods. Gone are inaccurate manual weight and height measurement techniques.

By using the CD-300 Spindle Counter you can easily and accurately count production yields at each processing stage. The on-going issues generated between internal departments over CD/DVD counts can now be eliminated. Equally bulk shrink-wrapped CD/DVDs can now be confidently shipped to customers.

This stand-alone, ergonomic unit, with minimum footprint is designed to give maximum trouble-free operation on a continuous basis, thus freeing up valuable resources for more cost-effective tasks. The worry of in-process count problems is eliminated.

WE CAN HELP YOUR CUSTOMERS FIND YOU

These days, if you have a business, you have a website. And if you have a website, you need people to see it. The trouble is, the Internet is getting bigger by the day and most websites get lost way down in the search results.

MARKETING FOR THE INTERNET

When people don't have enough customers in store, they use marketing to bring more people through the door. You should do the same for your website.

We use a variety of internet marketing techniques to help our clients, including Search Engine Optimisation (SEO), Pay Per Click (PPC) campaigns and social media and email marketing. But it all boils down to improving quality, impressing the search engines and attracting people's attention.

SEARCH ENGINE OPTIMISATION (SEO)

One of the best ways to get more people visiting your website is to get it ranking higher in search results. It's well known that people are much more likely to click on the results at the top, and if you appear on page two or lower down in the rankings you're unlikely to get many visitors. This study shows that nearly 70% of people click the top three results of your average search.

We've helped hundreds of companies improve their search rankings, and use ethical techniques that follow Google's guidelines.

In optimising your website we'll make it better for users as well as the likes of Google. That means professionally written content and blog posts, as well as technical advice on layouts, calls to action and HTML tags. Plus we have the knowhow to tweak the things you can't see, helping search engines understand the site and improving its authority. As part of the campaign we'll earn links to your site from relevant, good quality sources, and we'll help you with keyword research so the phrases you target are more likely to generate sales.

GOOGLE ADWORDS AND PPC

If you need more people visiting your website and making purchases quickly, you can always pay for visitors by advertising online. Pay Per Click campaigns like Google AdWords mean you pay when someone clicks on your ad. We can help manage your account (while you retain access to it), so you get more clicks, more leads and more sales – all while keeping your costs down.

You don't just have to have your ads on the search engine results pages. We can show you how to advertise using remarketing and other techniques, so people who have been on your site before will see your ads as they browse other areas of the Internet.

SOCIAL MEDIA AND EMAIL MARKETING

Although your website is your real presence online, social media accounts and email campaigns are great for generating extra traffic and promoting sales, new products and special events. We will help you set up and manage your Facebook, Twitter, Google+ and LinkedIn pages, as well as exploring strategies using useful sites like Pinterest.

Email remains your best chance of turning a lead into a sale; we can help with that, too. We'll advise you on the timing and content of newsletters, and encourage more people to sign up.

REGULAR REPORTS AND A TRANSPARENT SERVICE

As well as expert advice, problem resolution and copywriting services, we will send you regular in-depth reports outlining exactly what we've done each month and the effects on your search rankings and website traffic. You'll also have calls with one of our top internet marketers so you know exactly what's going on with your campaign.

Whatever you do, don't just make your website prettier. Make sure people can find it.

Call us now for a free, no-obligation assessment of your site, or contact us online.

Newspaper Solutions

RFID Solutions

We work with clients to identify the opportunities for enhancing the efficiency, accuracy and relevance of the activities of their front line workers. We offer clear, platform-agnostic advice about the different technologies that might be used.

We develop mobile solutions that take into account the requirements of the field worker and the needs of management. Our focus always considers function and then form, never sacrificing one for the other. We won't select the hardware before we know the functionality, we won't choose the interface without knowing who is using it, and we won't build a training plan without understanding the culture.

With over 10 years of experience, Fusient has the skill and insight to design, build and deploy custom applications that deliver substantial enhancements in business productivity.

Key aspects of Fusient's consulting and development offer include:

- System and function analysis
- Design consultation
- Application architecture
- Application development
- Training and deployment services
- Complete application and device support

Art can be subjective.
Its value isn't.

Profit from the expertise of Cheney Appraisal Services.

* [Learn more](#)

CHENEY APPRAISAL SERVICES

offers appraisal, collection management and art advisory services to clients throughout the New York tri-state area.

Professional appraisals may be needed for:

- * Insurance
- * Damage or loss
- * Estate tax
- * Equitable distribution
- * Estate planning and gifting
- * Divorce
- * Non-cash charitable donation
- * Resale/Liquidation
- * Collateral for financing
- * Relocation

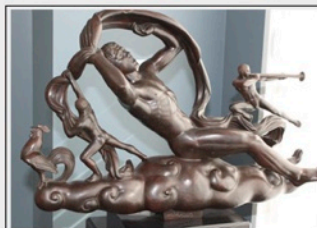

Louis XV French chest, fruitwood, 18th century

APPRAISAL

An appraisal can reduce risks such as being over or under insured, inequitably dividing personal property as part of an estate, being audited when claiming a deduction for charitable contributions or filing estate taxes, or selling for too little/paying too much. Appraisals conducted by Cheney Appraisal, an independent appraiser firm, are unbiased and impartial. Objective, qualified and professional, our goal is to minimize your financial risk.

[Learn more](#)

ART ADVISORY

Our comprehensive understanding of the art market can provide purchase and sales services for a single object, collection or estate. When starting a collection, we help you define, select, and buy art tailored to your unique aesthetic preferences and budget. When selling, we can negotiate preferential terms of sale on your behalf and identify the most advantageous venues for disposition including private sale, consignment, or auction.

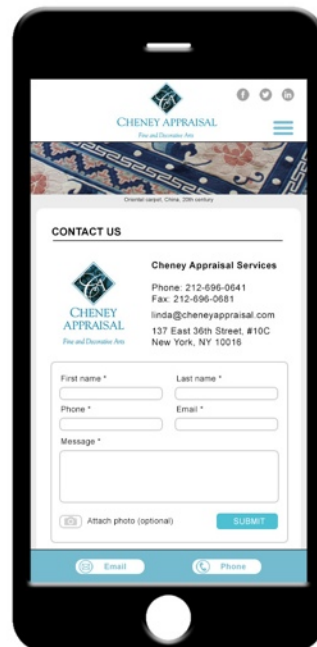

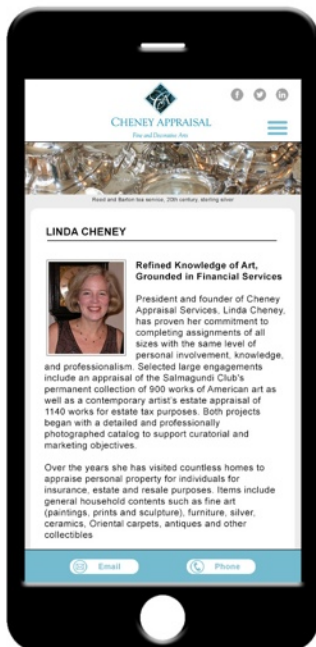

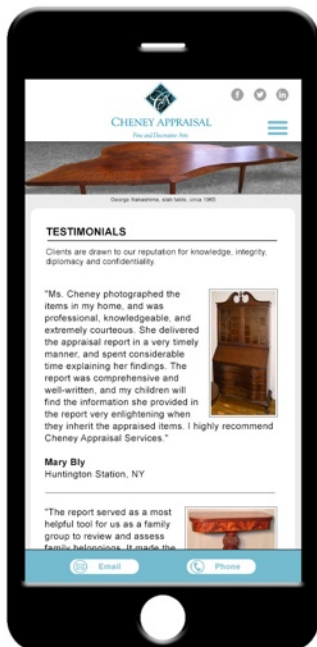

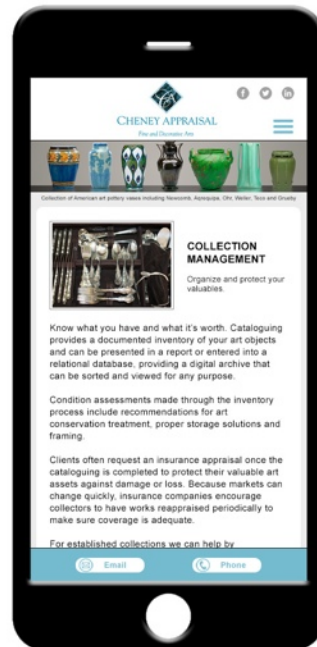

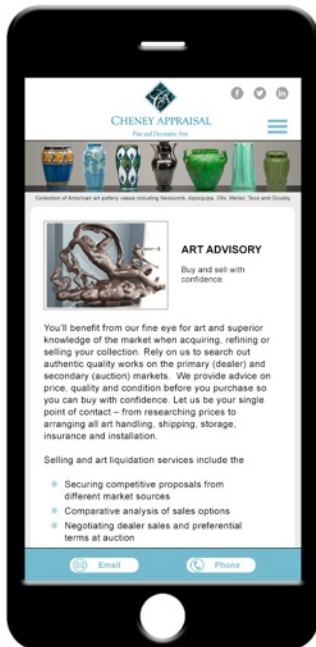

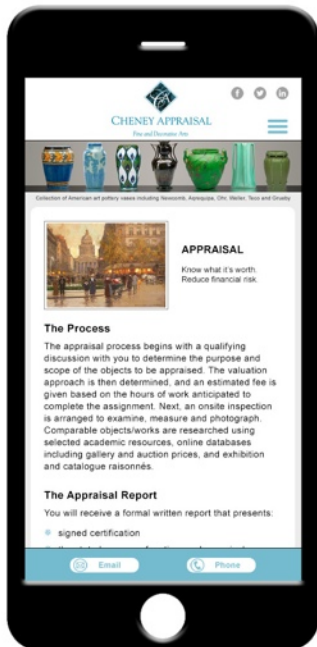

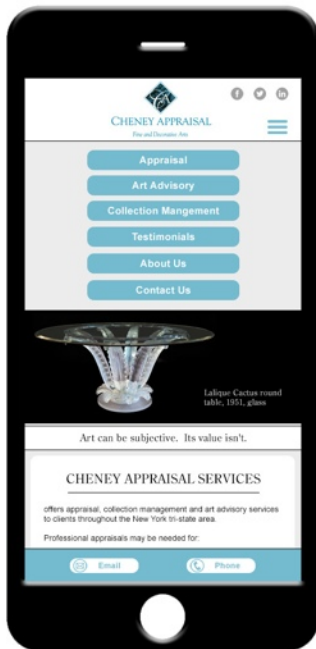

[Learn more](#)

COLLECTION MANAGEMENT

Organize, preserve and protect the aesthetic, historic and financial value of your art. We begin by ensuring your collection is properly inventoried so you may take a more strategic approach to managing all aspects of your art including acquisition, disposition, loans, display and conservation.

May 21, 2016
Full Moon, Blue Moon

Full Moon, Blue Moon. The Moon will be located on the opposite side of the Earth as the Sun and its face will be fully illuminated. This phase occurs at 21:15 UTC. This full moon was known by early Native American tribes as the Full Flower Moon because this was the time of year when spring flowers appeared in abundance. This moon has also been known as the Full Corn Planting Moon and the Milk Moon. Since this is the third of four full moons in this season, it is known as a blue moon. This rare calendar event only happens once every few years, giving rise to the term, "once in a blue moon." There are normally only three full moons in each season of the year. But since full moons occur every 29.53 days, occasionally a season will contain 4 full moons. The extra full moon of the season is known as a blue moon. Blue moons occur on average once every 2.7 years.
